

Dhrumil Amin

Full-Stack Developer | Node.js • React • TypeScript

+91 9104836843 | dhrumilamin.645@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full-stack developer experienced in building multi-tenant, production-grade web and mobile platforms with **Node.js**, **Express.js**, **React**, and **React Native**. Skilled in RESTful API design, real-time systems (Socket.IO, SSE), relational and NoSQL databases, and deploying scalable applications on cloud/VPS infrastructure with Docker and NGINX.

Education

Charotar University of Science and Technology

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.44 / 10

Jul 2024 – Jun 2028

Anand, Gujarat, India

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, Java, SQL

Frameworks & Libraries: React, Next.js, React Native, Node.js, Express.js

Databases & Infrastructure: MySQL, PostgreSQL, MongoDB, Redis, Prisma ORM, Docker, NGINX, PM2, Git/GitHub

Core Concepts: RESTful API Design, WebSockets & Real-Time Systems, Object-Oriented Programming (OOP), Data Structures & Algorithms, Multi-Tenant Architecture, Monorepo Architecture (Turborepo)

Experience

MCT IT Solutions

Full-Stack Developer Intern

May 2026 – Jun 2026

Ahmedabad, Gujarat, India

- Built **EGE Agritech**, a full-stack multi-tenant agricultural supply-chain platform, engineering a **Node.js**, **Express.js**, **Prisma**, and **MySQL** REST API within a **Turborepo** monorepo serving **6 user roles** across 6 React + Vite web apps and a React Native mobile app.
- Implemented the end-to-end harvest-to-delivery lifecycle – quality control, shortfall resolution, and automated wallet payouts – and integrated real-time **Socket.IO** updates across all roles, eliminating manual polling and improving data freshness.
- Deployed and maintained production infrastructure on a VPS using **PM2**, an **NGINX** reverse proxy, and Dockerized **MySQL & Redis**, with role-based subdomains for secure, scalable access.

IEEE CHARUSAT Student Branch

Webmaster

2025 - 2026

Anand, Gujarat, India

- Designed and deployed the official IEEE CHARUSAT SB website using **Next.js**, delivering smooth UI animations and optimized page performance.
- Own end-to-end website maintenance, deployment, and content updates supporting official IEEE activities and events.

Projects

QuizzX | *Express.js, PostgreSQL (Neon), Redis, SSE*

2026

- Engineered the backend for a real-time classroom quiz platform supporting **100+ concurrent participants**, live leaderboards, team competitions, and academic-integrity proctoring using **Express.js** and **PostgreSQL (Neon)**. [GitHub](#) | [Live Demo](#)
- Designed dual **Server-Sent Events (SSE)** streams achieving **sub-100ms** leaderboard updates; integrated **Redis** caching with automatic in-memory fallback, **JWT** authentication, rate limiting, versioned REST APIs, and anti-cheating mechanisms including tab-switch and fullscreen detection.

AI Resume Analyzer | *React, Node.js, Express.js*

2025

- Built a full-stack AI-powered web application that analyzes resumes and delivers structured feedback on skills, experience alignment, and ATS compatibility. [GitHub](#) | [Live Demo](#)
- Developed resume-parsing and AI-analysis pipelines to extract key information and generate real-time insights through a responsive React-based interface.

Smart Business Document Generator | *React, OCR, AI Summarization*

2025

- Developed a web application that automates generation of quotations, minutes of meeting (MOMs), and work orders from OCR-scanned and structured inputs. [GitHub](#)
- Integrated OCR-based document digitization with AI-powered summarization and automated PDF generation to streamline business documentation workflows and reduce manual effort.

Achievements

- NPTEL Elite Certification** in Programming in Modern C++
- Finalist, National-Level **ODOO Hackathon 2025**, **MSBC DataQuest 2025**, and **Reckon 7.0 2026**
- Lead Organizer of an institute-level **Line-Following Robot Race**
